Objective

Aspiring Junior Data Scientist with a strong foundation in Python, R, and machine learning. Skilled in data engineering, statistical analysis, and predictive modeling. Dedicated to leveraging analytical and technical expertise to solve real-world problems and drive data-driven decision-making.

Education

Bachelor of Computing and Data Science, Alexandria University **October 2022 – July 2026 (Expected)**

- **CGPA: 3.53**
- Comprehensive curriculum covering programming, data analysis, machine learning, and statistical methods.
- Developed foundational skills in Python, R, and data visualization, and applied them in hands-on projects.

Advanced American English Language Course, Ministry of Defense Language Institute **June 2018 – October 2018**

- Completed an advanced English course with a focus on improving fluency and professional communication.
- Specialized in academic writing, technical presentations, and cross-cultural communication.

Experience

AI & Data Science Training, Digital Egypt Pioneers Initiative **October 2024 – May 2025 (Expected)**

- Learned the basics of Python including data types, lists, file handling, and web scraping techniques.
- Mastered the use of Python Libraries to manipulate and explore data.
- Covered essential career development topics such as freelancing, personal branding, customer excellence, emotional intelligence, CV writing, interview preparation, and presentation skills.

Internet of Things (IoT) Summer Training, Alexandria University **July 2024 – September 2024**

- Gained practical experience in IoT systems by integrating sensors and actuators for real-time data monitoring and control.
- Learned to design and implement IoT applications with a focus on safety and automation.
- Completed the training with a capstone project and earning a grade A.

Projects

Titanic Survivors Analysis - [Source](#)

- Preprocessed data using imputation, scaling, and feature engineering to improve model accuracy.
- Developed machine learning models like KNN, Naive Bayes, SVM, and Decision Trees to predict outcomes effectively.
- Created visualizations with Matplotlib and Seaborn to present insights clearly.

Smart Weather Monitor (IoT Project) - [Source](#)

- Built an IoT product that utilizes real-time data from various weather and safety sensors to help users plan their day and stay safe from household hazards.
- Designed a visual representation of data and implemented audio warnings for potential dangers.

Study Group Database - [Source](#)

- Developed a database using MySQL and Python for a study group to track progress.
- Stored member information, current tracks, tasks.
- Created Python functions for ad hoc queries to add data and display statistics from it.

Walmart Data Analysis and Customer Segmentation - [Source](#)

- Conducted exploratory data analysis to examine and visualize the distribution of key quantitative variables.
- Created detailed visualizations, such as histograms, to illustrate frequency distributions and uncover actionable insights.

Technical Skills

Programming Languages: Python, SQL, R, Java, C

Data Analysis: Jupyter Notebook, Pandas, NumPy, Beautiful Soup, Selenium

Data Visualization: Matplotlib, Seaborn

Machine Learning: Scikit-learn

Database Management: MySQL, MongoDB

Soft Skills

Problem-Solving: Constantly assess the problem and my resources to come up with solutions.

Persistence: Consistently achieved project milestones despite technical challenges.

Leadership: Managed team projects for many university courses.

Teamwork: Collaborated with my peers to achieve the required objectives in a timely manner.

Languages

- Arabic (Native)
- English (Fluent)

Certificates

Introduction to Programming with Python, University of Helsinki (2023)

Covered basic to intermediate Python concepts, focusing on problem-solving and scripting.

Java Programming I, University of Helsinki (2022)

Introduced foundational Java programming concepts, emphasizing object-oriented design.

The 3rd Level of Advanced English Language, Ministry of Defense Language Institute (2018)

Focused on advanced grammar, vocabulary, and presentation skills for academic and professional settings.
